Professional Profile

Full Stack Developer with 8+ years of experience building scalable web and desktop applications using Angular, React, TypeScript, Node.js, and Electron. I enjoy working across the stack — from designing clean, responsive front-end experiences to developing robust REST APIs and database-driven backend systems. Experienced in building real-time communication and enterprise platforms that are secure, reliable, and performance-focused. Passionate about writing maintainable code and creating products that deliver real value to users.

Professional Experience

SOFTWARE ENGINEER III MOVIUS CORPORATION

Mar 2021 - July 2023
Bangalore, India

- Worked as a Full Stack Developer on **MultiLine Desktop** at **Movius**, helping build and enhance a secure enterprise platform for business calling and messaging using **Angular (v10-v13)**, **TypeScript**, **Electron**, and **Node.js/Java**.
- Designed and maintained scalable front-end architecture using **Angular Router**, **RxJS**, and **NgRx**, ensuring clean and predictable state management for real-time messaging, voicemail updates, and call workflows.
- Contributed to backend development by building **RESTful APIs** and **microservices**, while managing data persistence with **SQL databases**.
- Led development of key features such as Voicemail, Group Messaging, and Picture Messaging (MMS), integrating **SIP protocols**, **WebSockets**, and event-driven services to enable reliable, low-latency real-time communication.
- Built cross-platform desktop functionality using **Electron** and optimized API and database performance.

SOFTWARE ENGINEER MAVENIR SYSTEMS

Aug 2020 - Feb 2021
Bangalore, India

- Designed and developed **mobile-first, responsive web interfaces** using **Angular/React**, **TypeScript**, **JavaScript (ES6+)**, **HTML5**, **CSS3**, and **SCSS**, delivering consistent user experiences across **mobile phones**, **tablets**, and **desktop platforms**.
- Built and optimized **high-traffic e-commerce workflows** (device catalog, plan selection, checkout, and payments) by integrating **RESTful APIs**, focusing on performance, scalability, and reliability.
- Implemented **localization (i18n)** and **accessibility standards (WCAG)** while applying **responsive design principles** and **web performance optimization techniques** such as lazy loading and component optimization.

SOFTWARE ENGINEER / BUSINESS DEVELOPMENT MANAGER VIRTULIVE TECHNOLOGIES PVT LTD

Aug 2015 - Jul 2020
Mysore, India

- Worked as a **Full-Stack Developer** for the Roombr video conferencing platform, building scalable web applications using **Angular**, **TypeScript**, **JavaScript (ES6+)**, **HTML5**, **CSS3**, **SCSS**, and cross-platform desktop applications using **Electron**.
 - Designed and developed backend services and **RESTful APIs** using **Node.js** and **Spring Boot (Java)**, implementing **microservices architecture** and database integration with **SQL/MySQL** to support secure, high-availability systems.
 - Engineered real-time communication features using **WebRTC**, **SIP protocols**, and **WebSockets**, enabling seamless video meetings, virtual classrooms, and collaboration while optimizing performance, scalability, and low-latency communication across web and desktop platforms.
 - Served as **Business Development Manager**, generating **10 CR INR (~1.2M USD) revenue**, managing nationwide adoption of the platform, and engaging with enterprise clients and government stakeholders.
-

Technical & Graduate Projects

- **Ensync – Transportation Management System (TMS)**: Developed a **web-based TMS** for a trucking company using **Python**, **SQL**, and **web frameworks**, enabling **dispatch management**, **shipment tracking**, and **operational analytics**.
 - Developed the module for the **NIE India official website** using **HTML**, **CSS**, **JavaScript**, and **backend services**, with **database integration** for dynamic content rendering and a **responsive, scalable web architecture**.
 - **AI Financial Assistant for Students**: Developed a **machine-learning-based financial advisor** using **Python** to improve financial literacy among school students through **storytelling-based learning**. Implemented **personalized recommendations**, integrated a **MySQL database**, and leveraged **Tableau**, **AI modules** for data analysis and visualization.
 - **Portfolio Projects**: Designed and implemented **full-stack applications and web-based solutions** to showcase technical skills in **UI/UX design**, **Angular/React**, **TypeScript**, **REST APIs**, and **cross-platform development**.
-

Education

Master of Science (M.S.) in Information Systems and Technology

California State University, San Bernardino, CA | GPA: 3.66/4.0

Bachelor of Science (B.S.) in Information Technology

Sathyabama University, Chennai, India | GPA: 7.8/10.0

Skills & Technologies

Angular (v10-v13), React, TypeScript, JavaScript (ES6+), RxJS, NgRx/Redux, Angular Router, HTML5, CSS3, SCSS, Flexbox, Grid, Media Queries, Responsive Design, Electron, Node.js, Java (Spring Boot), RESTful APIs, Microservices, SQL/MySQL, SIP, WebSockets, WebRTC, Docker, CI/CD (Azure DevOps, Jenkins, GitHub Actions), Git, Jira.
